

**In every society, fountains embody culture,
taste and style: HANSAMURANO.**

 **HANSA**
experience water

No need to touch: with HANSAMURANO and HANSAMURANO E.

HANSAMURANO is a milestone in bathroom faucet design. Chrome, glass and a whole new and innovative water experience make it a unique expression of modern bathroom culture. The special HANSAPERMATEC coating makes the fine glass bowls very easy to clean and significantly reduces the accumulation of limescale and grime deposits.

The electronic variant HANSAMURANO E provides an even more fascinating water experience. Its uncomplicated flow is down to the state-of-the-art sensor technology. The temperature is simply set by means of a small pin. When your hand nears the sensor in the middle of the glass bowl, the water begins to flow. The water flow stops automatically after an individually adjustable time or by reactivating the sensor.
